### Search Notes

Dave,

Attached is the completed search for information about the TENS CAM device. I searched the inventors in the patent as well as non-patent literature and I have attached the results. I also did an extensive search for the device in numerous bibliographic and full-text databases as well as on the Internet. I could not find any information on the device. I did find one article as part of a blog – the one I told you about on the phone. The date of the webpage is 2004, but I have included a copy with the results as it contains contact information for the author that you might find useful. Attached are the search strategies used for the searches performed.

If you have a moment, please fill out the attached STIC Feedback Form. If there is anything I can do to refine or revise this search, please let me know.

Sincerely,  
Ethel Leslie

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3730

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Wow - two questions in a row about Herpetic infections.

With regard to Shingles, there is a great herbal remedy for all of the Herpes type viruses -- it's called *Larrea tridentata* [aka chapparal]. The difference is that the new *Larrea* preparation -- brand name Shегоi -- is processed to eliminate a toxin that caused the herb to have a high side effect profile. If you want complete info, contact Sher Komisar at 914 966 8053 -- the company was giving out free samples at one point. It is available as capsules, spray and topical cream. It comes from my new neighborhood -- the Sonoran Desert!

With regard to Quillan's idea -- it was first expressed indirectly in the famous line: "Dust Thou art to dust returneth" - which is why I say the molds always win!

---

A novel phytochemical is on its way for Herpes. Nevertheless, there are many reports of long-term benefit from frequency interventions, such as Rife or Clark. Each specific frequency lasts 3 seconds.

It appears to be necessary to repeat treatments for a while unless we can perfect the different frequencies for the different life stages of the virus/-es? No pills, no potions, no complex protocol...

---

We have had very good success with shingles using bio-ox med (UBI & H<sub>2</sub>O<sub>2</sub>). Only tried it on a few cases but all have resolved completely with no pain and rapid healing of lesions. In each case we're caught it very early so not sure if it will work as well if treated later but it is very safe and certainly worth a try.

---

Hi Doctor,

I am an acupuncturist. I have developed a treatment for shingles which is amazingly effective; the pain of an acute outbreak will usually be gone within two hours and the outbreak gone within four daily visits.

If you use this procedure please let me know as I am trying to gather some statistics for an upcoming journal article.

This is a non-needle electro therapy treatment.

Materials: one pantheon or similar electroacupuncture stimulator

Gauze

saline solution.

Procedure: cover the shingles with the gauze. Soak with saline (it must be kept moist during the treatment)

Clip the electrodes directly to the wet gauze. The current should be set at a low frequency and the amount of current should be barely felt. This is left on for at least one hour. The patient will have tremendous pain reduction by the time the treatment is over.

This treatment will help normalize the skins electrical potential. Feel free to call me with questions. 781-449-0909.

---

Hi Doctor.

I have a devise called the TENS CAM that is great in relieving patient's aches and pains. I believe that Dr. Gordon has one, too. I have an article about it and some testimonials that I shall paste-up at the end of this letter. If you have questions or further interest, I suggest we talk on the phone. My number is below or you can send me yours and I shall call you.

Here are a couple of recent TS success stories. Three weeks ago Martin, father of an autistic five year old boy, called to cancel his son's TS appointment because he was having renal colic. I encouraged him to come in anyway with Derrick. I treated Martin for four minutes with the TS and he could not get over the immediate relief of his pain. He was doubled over when he walked in and left standing tall. Although I told him to call prn for another treatment, I didn't see him until the following week when he brought Derrick back. He had no more pain after the Rx. Incidentally, Derrick, five, is on an oral chelation program and has shown dramatic improvement by observation by family and teachers at school in addition to some types of testing at school.

Friend LaFrance, recently a recipient of a kidney transplant, and on numerous medications, had to have a painful and infected tooth removed. I dropped by her house after she returned for the dentist, treated her for four minutes with the TS and she had no pain.

TS INFO FOLLOWS:

TENS CAM -- A NEW APPROACH TO HEALTHCARE FOR THE 21st CENTURY

by ROY B. KUPSINEL, M.D.

P.O. Box 620550

Oviedo, FL 32762-0550.

Tel: 407-365-6681 Fax: 407-365-1834 E-mail: RKupsinel@aol.com

I started my TENS CAM treatment to the left TMJ (jaw joint) and the area of cavitation surgery at the former site of tooth 19. It takes two to four minutes and then I do my back for the sciatica for the same period of time.

Briefly, my osteopathic physician, Dr. Chuck Crosby, invented this devise, called the TENS CAM. Earlier this year he was doing prolotherapy (type of injection) on me and also used the TENS CAM. He asked me to participate in a double-blind study as a patient and a doctor. I worked as a doctor in this study for three afternoons. This study is sponsored through the University of Central Florida. Although not yet completed the results are quite positive for pain relief in patients with low back pain. Dr. Crosby was well received at the recent ACAM (American College for the Advancement

in Medicine) Phoenix meeting where he exhibited and demonstrated the TENS CAM. It is a miracle machine. During my recent California trip, on a scale of 10 to 0 my pain was 10+.

Back home it was about 4 prior to the first TS treatment. I have had daily treatments for two weeks to both the back and the left TMJ area. I am down to between 0 and 1/2 with the back/sciatica pain and the TMJ pain is gone.

Well, I was so impressed that I purchased a TENS CAM to help myself and my patients. I have treated about twenty patients and all have had great results.

Susan deFreese had cavitation (jaw bone) surgery (four quadrants!) with Wes Shankland in Ohio about a month and a half ago. Dr. Shankland told her the pain might persist for three months. I called her and she came during her lunch hour for the TS treatment. I treated her back pain between her shoulders and it immediately vanished. She left with only slight relief of the constant throbbing pain in her jaws -- 8. She called an hour later to tell me it was gone. I offered to give her another treatment but she didn't call.

So, I called her a week later. She told me that the throbbing pain did not come back!!! This was a miracle!

Briefly, the device consists of a battery operated TENS unit connected via a cable to a transducer that contains an array of quartz piezo electric crystals. It is mounted on an adjustable black steel tripod. The transducer, a white cylinder 1 and 1/2 inches in diameter and five inches long, is pointed at the focus of the painful area. It is about fifteen inches away from the patient. The treatment is from two to four minutes. The different frequencies and waves from the TENS unit pass through the transducer/crystal and are delivered to the body. Theoretically, these energies bring the painful area back to the natural earth and body frequency of Schumann -- 7.86 Hz. When the abnormal body vibration is corrected the pain problem is, too, and it disappears.

In my experience every patient has had some degree of pain relief. It is often immediate and lasting. In some cases there may be a delayed response as with SD, in which her pain was completely relieved in about an hour. Patients with visceral dysfunction may be treated.

The TENS CAM sells for \$2000 + \$80 shipping and is only available to MDs, DOs, DCs, DDSs, DMDs, and NDs. For faster delivery, pay with a certified check. I am a Sales Representative and request that you place your order for a TENS CAM through me. A brochure and video are available upon request and at no charge. It may also be possible to arrange a personal demonstration for yourself, patients and other professionals, if an owner is in your area. Contact me for details. For patients desiring treatment, inform your health care professional about TENS CAM. My appreciation to Charles Crosby, DO -- truly a medical genius of this 21st Century!

## TENS CAM TESTIMONIALS

I have used the TENS CAM for over three years on an almost daily basis. It has many applications, but perhaps its' most spectacular is to replace deep ganglion injections. A fifteen minute procedure requiring a 3 1/2" needle can be treated in two minutes with the TENS CAM.

(Renfrew, Ontario, Canada)

\*\*\*\*\*

Using the TENS CAM over the last eight months, I have been successful in treating such diverse problems as Tarsal Tunnel Syndrome, non-healing diabetic ulcers and a myriad of enthesopathies. The success rate is equal, and probably exceeds, all of the other modalities. To quote a patient, "Doc, that works better than the shots."

(Bluefield, VA)

\*\*\*\*\*

The TENS CAM unit is the most impressive device I have used in pain management. It has obviated the need for invasive interventional techniques in many instances.

(Merrillville, IN)

\*\*\*\*\*

We have used the TENS CAM regularly in our integrative dental practice for a multitude of procedures, including dizziness, cavitations, sensitive teeth, and head and neck pain. I am convinced of its validity.

(Bartlett, IL)

\*\*\*\*\*

I find the TENS CAM to be quite efficacious in the treatment of TMJ pain.

CRAIG A. ZUNKA, DDS (Front Royal, VA Tel: 540-635-3610) \*\*\*\*\*

The TENS CAM is effective in treating patients with musculoskeletal problems. It reduces pain, edema associated with inflammatory conditions, such as, arthritis, ligament strains, soft tissue injuries, cellulitis, rhino-sinusitis and temporal mandibular joint syndrome. ... It has been effective in treating complex musculoskeletal injuries when other modalities were unsuccessful.

(Madeira Beach, FL)

\*\*\*\*\*

I have found the TENS CAM to be fast, easy, and more versatile than other equipment for my musculoskeletal patient practice. I have also been able to gain results with patients with visceral conditions and thus expanded my scope of practice.

(Winter Park, FL)

\*\*\*\*\*

Recently I had a tooth extraction that caused me a lot of pain and swelling. Dr. Kupsinel gave me just one treatment with the TENS CAM and the pain and swelling subsided tremendously and quickly -- within one-half hour. I didn't need to make another appointment for the first treatment was successful.

(Oviedo, FL)

\*\*\*\*\*

The TENS CAM treatment I had after my jaw bone surgery that included three extractions had wonderful results. My mouth had been throbbing continuously for a few weeks. Within an hour after the treatment, the throbbing was totally gone and did not return. Subsequently, I also had the treatment for the intense pain of a sinus infection. I received relief immediately after the treatment and within an hour, the pain was totally gone. The TENS CAM is a tremendous discovery. I plan to continue to seek this treatment for future needs. SUSAN deFREESE -- PATIENT

(Longwood, FL)

---

Herpes

Dear Kam,

Larrera Tridentata or commonly known as chaparral has resurfaced. The company who figured out a way to reduce its potential liver toxicity is marketing it as "shegoi". I have had great success with a variety of viral infections. The company puts out a book written by an ND strictly on the benefits of larrera in herpes. It comes in oral and topical. Search for shegoi on google.

---

I hear glycyrrhizin works well for some viral infections...

---

I agree that I have had great success with IV Glycyrrhizin, which I used to obtain directly from Japan and did not always get the same results with other formulations. However, it is worthwhile remembering that topically applied RNA SKIN FORMULA, which will be available JUNE 1st from Longevity Plus will control ANY INFECTION while also giving the energy to the skin to promote healing. This same RNA material will also be used to stop all ear infections when applied directly to the ear in humans and animals including dogs. It will also be made available with Xylitol to stop sinus infection. It will also be made available with Aloe Vera Gel for topical applications as well as an anti-aging face cream.

Remember that shingles respond well to topical Euphorbium (for nasal spray) from HEEL in Albuquerque (1-800-621-7644) so it should prove antiviral for all herpetic lesions also. I use Oxidative therapies to help lower the total body burden of HERPES with Ozone or Ultraviolet blood irradiation and/or high dose Vitamin C oral and IV and the LYSINE still helps many, if taken immediately in big doses.

*Sincerely,*

*Garry F. Gordon, MD,DO,MD(H)*
